

Two-component epoxy resin systems

Add the hardener

Mix resin and hardener thoroughly and bubble-free

Apply mixed components

- ▶ providing fast and durable repairs
- ▶ bondings
- ▶ coatings

Applications

For workshops and maintenance departments in all industries, WEICON Plastic Metal is the ideal product for:

- ▶ repairs on aluminium and light alloy
- ▶ reconditioning and repairing castings, pipes and tanks
- ▶ filling blowholes and microporosities
- ▶ working over shafts, sliding bearings, pumps and housings
- ▶ welding without preheating (wherever welding is problematic or impossible)

In industrial design and manufacturing, WEICON Plastic Metal is used for making moulds and models, in particular:

- ▶ as an aid for making moulds for rubber and injection moulded parts
- ▶ making dies
- ▶ templates and models for pre-production testing
- ▶ lining of cutting tool guides
- ▶ making fixing devices

Now included in every package

Contour Spatula Flexy

Versatile use, e.g. for coating and processing 2C-adhesives. The spatula is perfect for applying adhesives on large or small surfaces. It is made of wear-resistant polyamide.
