## Declaration of RoHS Compliance Showa, 8005PF and 8005 Products

Showa is committed to providing customers with products that comply with applicable regulations and international protocols to which they are subject, including the requirements of the European Union Directive on the Restriction of the use of Certain Hazardous Substances in Electrical and Electronic Equipment 2011/65/EU ("RoHS Directive").

Showa hereby states that the substances restricted by the RoHS Directive are either not used in the product(s) listed above, in amounts exceeding the maximum permitted levels or are not intentionally added to the materials used in the product(s) in amounts exceeding the maximum permitted levels. To the best of our knowledge, none of our suppliers use the restricted substances in amounts exceeding maximum permitted levels in the raw materials they provide or to manufacture their products; this statement is based on information provided by our suppliers. Please note that Showa and its suppliers do not analyze its products for substances not purposely added; trace amounts of any chemical and substance might be found as impurities in any product. Showa will make every reasonable attempt(s) to notify its customers of changes to raw materials or processes that may cause a product to fail to comply as we learn of such situations.

Regards,
